**SWEAT MANAGEMENT AND REMOVAL TECHNOLOGY**  
***(MADE IN USA) is behind the most comfortable reusable mask you can wear.***

SMART Tiers® Fabric is a breathable dual layer Berry compliant proprietary fabric that was designed for enhanced comfort shirts using inherent chemical free properties that help your body perform better with more endurance.

**PROTECT OTHERS:**

**Moisture moves only from the inner layer to the outer layer.**

The hydrophobic (hates water) inner layer, which touches your skin, breaks the surface tension of your sweat, humidity, sneeze, cough, and saliva and moves it away from you to the outside layer. This polymer layer is also self extinguishing. Your skin stays comfortably cool and dry while **protecting others**. Because bacteria needs moisture to grow, fabric and skin are odor free. The inside will stay dry and not cling to your skin.

**PROTECT YOURSELF:**

**Moisture does NOT move from the outer layer to the inner layer.**

Moist contaminants are absorbed and dry particles are filtered in the hydrophilic (loves water) outer layer and STOP

before the inner layer and do not touch your skin. The mask is **protecting you**. Because of electrical charge and the Browning effect, most particles smaller than the hole size are captured. Testing has been ongoing at the Nelson Laboratories and indications are two layers may provide class three NIOSH N95 protection as developments are underway to provide natural antimicrobial and repellency to the outer cotton layer. Currently because pressurized flow may penetrate; these masks are for Civil Use, not surgical.

**Wearing a breathable SMART Tiers masks 24/7 is important**

during possible contact with viruses. Your body should stand a better chance of fighting a lesser quantity of viruses than a massive influx caused by removal of a mask or a leaky mask. We recommend alternating daily or washing daily. Fabric softener and dryer sheets are not recommended.

If you wish to print on mask, please contact us for details. SMART Tiers will not sublimate because mask is not polyester.

### THREE LAYERS OF PROTECTION

(FILTER OUT DUST, DROPLET, SMALL PARTICLE, ANTI VIRUS, COMFORTABLE AND BREATHABLE, FLEXIBLE AND SUPER LIGHT WEIGHT)

#### SKIN FRIENDLY BREATHABLE NON-WOVEN LAYER

#### MELTBLOWN NON-WOVEN FILTER LAYER

#### OUTER NON-WOVEN LAYER

## CV126 Pleated Disposable Masks

When you spend prolonged time in sensitive / critical health-care environments, you should demand face masks that are comfortable! This disposable face mask has ear loops that are designed for fast, convenient and comfortable wearing. It's inner cellulose layer is designed with comfort in mind as well. Manufactured in a converted watch factory, these masks have international surgical certification; USA FDA is pending.

- Extra stretchy ear loops keep your mask on comfortably
- Dye-free, chemical-free, fiberglass-free
- Latex-free ear loops
- Slim aluminium and pvc wire fits the mask to the shape of your nose
- Efficient meltblown cloth - ignition point is relatively high - normal fire cannot ignite!
